RE: Letter of Accommodations

Dear Mr. Schneider:

Pursuant to my recent conversation with you, I pause to give thanks to the creator for being responsible for our present acquaintance. I pray that the same will be a fruitful opportunity for all of those that come in contact with this breakthrough for a safer and healthier pathway to longevity for all of mankind.

I would like to acknowledge the main reason in which the contents of this correspondence is being prepared; I, Dr. James Hall, who is a national orator, epidemiologist, clinical specialist and the recognized US Ambassador of Goodwill, HIV/AIDS under the Clinton administration do hereby certify that, I have done a complete investigated study on the enzyme formula indicated by the manufacturer. Wherefore, I can state that this product alliance will promote the right path to arresting the degenerateness in the human body.

I entrust that this letter will suffice for the purpose for which it was prepared and receive the positive accommodations from all of those who read it and/or have had it read to them.

Remember "A LIGHT FOR A CURE KEEPS BURNING FOR A SAFE AND HEALTHIER LIFE".

Sincerely Yours,

James B. Hall
