Having 'friendly' bacteria in the intestines is one of the keys to boosting the immune system. These 'friendly' bacteria are destroyed by such common factors as carbonated drinks, laxatives, birth control pills, coffee, alcohol, aging, stress and antibiotics taken for infections, colds and flu's. (even antibiotics found in the meat we eat)

Friendly aerobic bacterial strains can aid in digestion and elimination, (suppressing harmful anaerobic bacteria) improve absorption of minerals and reduce toxins in the bloodstream and GI tract. Enriching Gifts International Pro Biotic Flora with FOS has not one, but eight of these 'good-guy' bacterial strains. These eight strains are selected and manufactured according to the proprietary processes developed by Dr. Khem Shahani, the world's leading expert in the area of friendly bacteria.
